Name	Fareed Baloch
Category	Co-opted Governor
Background	I have an engineering and MBA degree. After serving as a corporate manager in an airline, I became an entrepreneur and founded a few successful tech start-ups, such as Matriks Ltd, Zoom Dispatch and my most recent venture is a social enterprise, Mindsum.org. I'm a design-led, data-driven and people-centric person. I'm an architect of tech systems that make a difference in people's lives. I advise start-ups on how to create an impact with human-centred design. Being a developer with an MBA I have a very good understanding of the complete life cycle of IT projects - from idea, prototyping, UX/UI design to development to launch, marketing and sales. Governor Responsibilities & Involvement	I believe I'll be able to bring my tech and management skills and contribute to any projects that require IT expertise/ input. I'll also be able to support school in project management, website user experience for parents and staff and any project management task. With strong background in digital transformation, I may be of help to modernise the digital systems and automation.
